## หน้า CATEGORIES

### แบ่งเป็นหมวด 3

#### NETWORK MONITOR

**ActiveXperts Network Monitor** monitors your network for failures and irregularities. Monitor all aspects of your cloud, virtualization platforms, servers, workstations, devices, applications, databases, environment and more.

#### SMS MESSAGING SERVER

**ActiveXperts SMS Messaging Server** is a Windows-based software suite to send, receive and process SMS and e-mail messages. Supports GSM, HTTP(s), SMPP, SMTP and POP3. Message processing can be fully automated.

#### SMS COMPONENT

**ActiveXperts SMS Component** is a Windows ActiveX/COM component to provide SMS messaging communications. Supports GSM, SMPP and HTTP(s). Includes samples for Visual Studio .NET (C#, VB), VB, VC++ and more.

#### NETWORK COMPONENT

**ActiveXperts Network Component** is a Windows ActiveX/COM component offering a variety of IP network protocols. Includes samples for Visual Studio .NET (C#, VB), VB, VC++, ASP.NET, ASP, PHP and more.

#### SERIAL PORT COMPONENT

**ActiveXperts Serial Port Component** is a Windows ActiveX/COM component offering serial, asynchronous communications. Includes samples for Visual Studio .NET (C#, VB), VB, VC++, ASP.NET and more.

#### EMAIL COMPONENT

**ActiveXperts Email Component** is a Windows ActiveX/COM component offering SMTP and POP3 functionality for developers. Includes samples for Visual Studio .NET (C#, VB), VB, VC++, ASP.NET and more.

#### ACTIVEXPERTS HYDROMAGIC

**ActiveXperts Hydromagic** is used by survey, mining and dredging companies to perform hydrographic surveys in rivers, ocean, ponds and reservoirs. Supports GPS/RTK receivers, hydrographic echosounders.

#### FREWARE UTILITIES

**ActiveXperts Freeware Utilities** is a set of useful free tools that run on any 32/64-bit Windows platform.

# 1. ACTIVEXPERTS NETWORK MONITOR

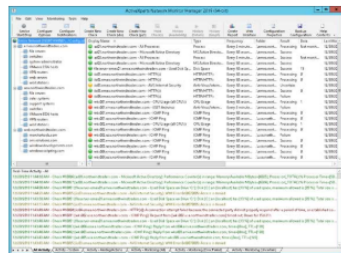

## OVERVIEW

\*\*\* ActiveXperts Network Monitor 2019 was released on January 2, 2019 --- [Release Notes](#) \*\*\*

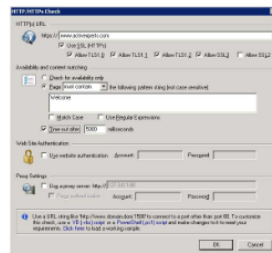

ActiveXperts Network Monitor is a network and server monitoring tool to allow administrators to monitor the network for failures and irregularities automatically. It can monitor all aspects of your LAN- and WAN servers, workstations and IP devices. For years, ICT administrators, network operators and helpdesk employees have relied upon the power, flexibility and reliability of ActiveXperts Network Monitor.

- Runs as a service, on a Windows 2019/2016/2012(R2)/2008(R2)/10/8/7 platform
- Available as 64-bit product and 32-bit download
- Monitors Windows, Linux, (IP) devices, databases, virtualization platforms and more
- Agentless
- PowerShell, VBScript and SSH scripting supported
- Up to 15 checks **for free**

## 2. ACTIVEXPERTS SMS MESSAGING SERVER

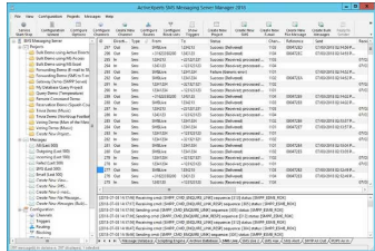

### OVERVIEW

<https://www.activexperts.com/sms-messaging-server/>

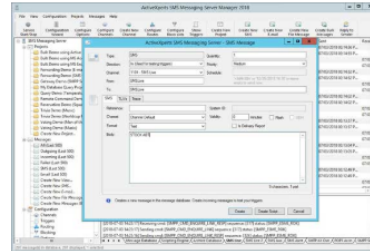

ActiveXperts SMS Messaging Server is a messaging framework to send, receive and process SMS and e-mail messages.

- SMS messaging framework to build custom SMS based applications.
- Automatically send, receive and process messages
- Open system, API and Database layout are documented
- Runs as a service on Windows 2019/2016/2012(R2)/2008(R2)/10/8/7 in 32 or 64 bit
- SMS communication through GSM, HTTP and SMPP
- E-mail communications through (secure) SMTP and POP3

### Low/Medium volume SMS

To send/receive/process low- and medium volume SMS use a GSM modem.

Install SMS Messaging Server on a Windows computer, connect the modem to it (USB/COM/TCP-IP) and insert a SIM card.

ActiveXperts supports the majority of all available GSM modems. Recommended: a **Cinterion** GSM modem.

### 3. ACTIVEXPERTS SMS COMPONENT

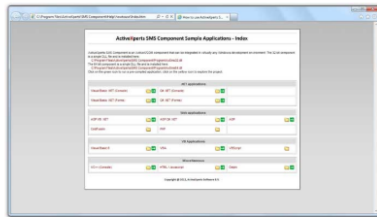

<https://www.activexperts.com/sms-component/>

#### OVERVIEW

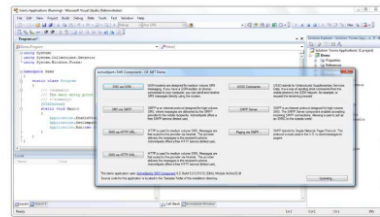

ActiveXperts SMS Component provides developers with a fast, reliable and easy to use interface (API) for sending and receiving SMS and Pager messages.

- Easy to use API
- SMS messaging via GSM modem, SMPP, HTTP and Dialup
- Build your own SMSC with the SMPP server API
- Pager messaging via SNPP
- 32-bit ActiveX and 64-bit ActiveX included
- Many samples available in C#, VB, ASP.NET and more

#### Features

##### SMS key features

- Send and Receive SMS messages through GSM modem, SMPP, HTTP and/or Dialup
- Accept SMPP connections with SMPP Server API
- Verify delivery of SMS messages through delivery reports
- Build in templates for sending WAP Push and vCard messages
- Support for Unicode.
- Supports automatically splitting up / re-assembling multipart messages
- GSM Supports Windows 'Phone and Modem devices' (TAPI) and direct COM ports
- Support Multi-threading environments.
- Troubleshooting facilities by tracing all modem / network commands and responses
- Lots of samples for various platforms: MS Visual Basic .NET, MS Visual C++, MS Visual C# .NET, ASP .NET and more

## 4.ACTIVEXPERTS NETWORK COMPONENT

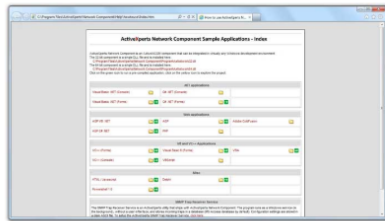

### OVERVIEW

<https://www.activexperts.com/network-component/>

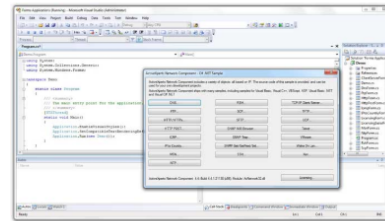

ActiveXperts Network Component is a Network Communication component for Windows developers.

- Easy to use API
- Supports IPv4 and IPv6
- Provides popular TCP and UDP protocols
- Runs on all 32-bit and 64-bit Windows platforms supported by Microsoft
- 32-bit ActiveX and 64-bit ActiveX included
- Samples available in C#, VB, ASP.NET, HTML, PHP, Javascript, Delphi and more

How to use the Component

Visual Studio.NET project

Console Application

Web Application

With ActiveXperts Network Component, you can use the following objects:

- **Dns** - Query servers running a domain name service (DNS). [More »](#)
- **Ftp** - Read web pages, analyze content. Supports HTTP-Post, proxies, SSL and more. [More »](#)
- **Http** - Read web pages, analyze content. Supports HTTP-Post, proxies, SSL and more. [More »](#)
- **Icmp** - See if you can reach another computer and determine how long it takes. [More »](#)
- **IPtoCountry** - Translates IP addresses to countries. Use it for web log analysis, marketing purposes, etc. [More »](#)
- **Ntp** - Query NTP time servers and retrieve the actual date and time. [More »](#)
- **Radius** - Networking protocol to provide centralized authentication and authorization management. [More »](#)
- **Rsh** - Run commands or scripts on a remote UNIX or LINUX computer through RSH. [More »](#)
- **Scp** - Securely transfer files between two computers using the SSH (Secure Shell) protocol. [More »](#)
- **Sftp** - Allows secure network file transfer over an insecure network, such as the Internet. [More »](#)
- **Snmp** - Use SNMP operations Get, GetNext, Set and Trap; supports SNMP v1 and SNMP v2c. [More »](#)
- **Snmp Trap** - Send/receive SNMP traps to/from SNMP agents (v1, v2c) in the network. [More »](#)
- **Snmp MIB** - Load a MIB database into memory and iterate over all objects and view all properties. [More »](#)

## 5.ACTIVEXPERTS EMAIL COMPONENT

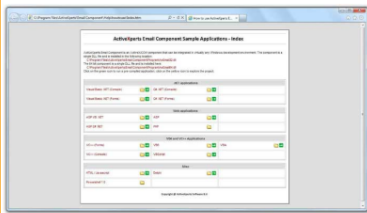

### OVERVIEW

<https://www.activexperts.com/smtp-pop3-component/>

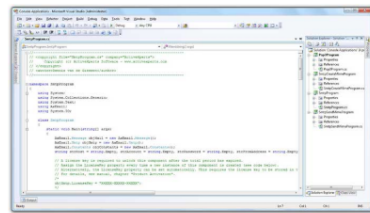

ActiveExperts Email Component is a powerful easy-to-use programming interface to SMTP, IMAP and POP3 email communications. It's perfectly suited for situations in which e-mails need to be sent/received automatically, in batches, from custom applications, web servers, or from the command-line.

- Easy to use API
- Send using SMTP
- Receive using IMAP or POP3
- Secure (TLS/SSL) and non-secure
- Support for advanced mailing features
- 32-bit ActiveX and 64-bit ActiveX included
- Samples available in C#, VB, ASP.NET, HTML, PHP, Javascript, Delphi and more

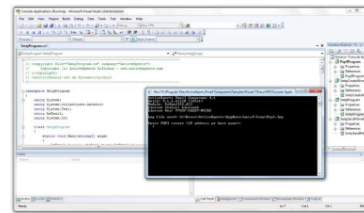

Screenshot

How to use the Component

Visual Studio.NET project

Console Application

Web Application

ActiveExperts Email Component features the following:

- Send messages using SMTP;
- Receive messages using IMAP or POP3;
- Secure SMTP, IMAP and POP3 (TLS/SSL);
- Advanced IMAP search and fetch options;
- Multiple Attachments (ASCII and binary);
- Rich Text message body formatting (HTML);
- Embedded objects in message body, like sounds, images, etc.;
- Full Unicode support;
- SMTP authorization, supporting AUTH PLAIN, AUTH LOGIN and AUTH CRAM-MD5 login algorithms;
- IMAP authorization, supporting LOGIN and PLAIN
- POP3 authorization, supporting Plain text and APOP3 authorization;
- Load and save (import and export) MIME (.mim) files;
- Support for 7/8 bit, quoted-printable and base64 encoding;
- Detailed error descriptions;
- Advanced tracing (for troubleshooting purposes).

## 6.ACTIVEXPERTS SERIAL PORT COMPONENT

### OVERVIEW

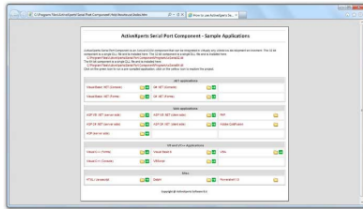

<https://www.activexperts.com/serial-port-component/>

### ACTIVEXPERTS SERIAL PORT COMPONENT

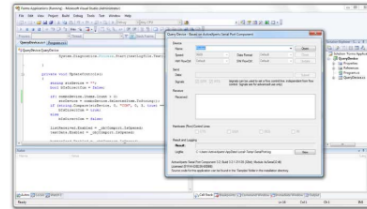

Adding serial communications requires specialized knowledge that might be outside an individual programmer's expertise. For years, developers have relied upon the power and reliability of the ActiveXperts Serial Port Component serial communications control.

- Easy to use API
- Control devices over a serial port
- 32-bit ActiveX and 64-bit ActiveX included
- Samples available in C#, VB, ASP.NET, HTML, PHP, Javascript, Delphi and more

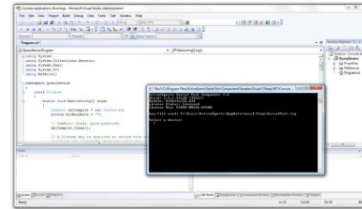

Screenshot

How to use the Component

Visual Studio .NET project

Console Application

Web Application

Use ActiveXperts Serial Port Component for different purposes:

- To control manufacturing machines via the serial port;
- To configure network devices (like print-servers, routers) via the serial port;
- To control a modem, connected to the serial/USB port or Bluetooth;
- To transfer files through a null modem cable;
- Any other scenario where serial communications is involved.

ActiveXperts Serial Port Component features the following:

- Direct COM ports supported (e.g.: 'COM2');
- Windows Telephony Devices supported (e.g.: 'Standard 9600 bps Modem');
- Support for RS-232, RS422 and RS485;
- Up to 256 ports opened simultaneously;
- Thread-safe to allow the component in multi-threading environments (samples included);
- Support for Hayes compatible modems connected via serial port, USB or Bluetooth;
